PAINWEEK® 09

September 9–12

Red Rock Casino, Resort, and Spa
Las Vegas, NV

PAINWeek® 2009

Purpose Statement

PAINWeek provides practical knowledge and tools for busy pain management practitioners to utilize in their daily practice.

Educational Need

"Pain is the most common reason Americans access the health care system and is a leading contributor to health care costs. Pain is also a leading cause of disability. Most painful conditions can be relieved with proper treatment, and providing adequate pain management is a crucial component of improving and maintaining quality of life for patients, survivors, and their loved ones. Yet people in pain often face significant barriers that can prevent proper assessment, diagnosis, treatment and management of their pain".

Summary of S.660, Hatch/Dodd National Pain Care Policy Act of 2009

The National Pain Care Policy Act was a response to the realization that more than 40 million Americans cope with chronic pain issues that negatively impact their professional and personal lives. Most healthcare providers have not had adequate training in pain management, and this remains one of the biggest obstacles to patient care.

Learning Objectives

After attending PAINWeek 2009, delegates should be better able to:

- Distinguish multiple pain syndromes (abdominal, neuropathic, nociceptive, rheumatologic)
- Define the mechanisms of action of different pain types
- Determine effective treatment protocols among existing and emerging therapies
- Evaluate the use of hypnosis in pain management
- Apply adult learning theories to patient, provider, and caregiver communications
- Calculate opioid conversions
- Develop an opioid teaching program
- Cite current medical/legal issues impacting clinical pain management
- Assess strategies for treating pain and chemical dependency

Target Audience

Physicians, nursing professionals, physician assistants, dentists, pharmacists, psychologists, and podiatrists who treat patients in pain.

general information

The PAINWeek curriculum covers content relevant to frontline practitioners who are part of the pain care continuum. The general session provides practical information and education that have immediate application to clinical practice for pain specialists, practitioners with advanced pain management skills, and primary care clinicians who regularly treat pain.

All identified conflicts of interest are thoroughly vetted by Global for fair balance, scientific objectivity of studies mentioned in the materials or used as the basis for content, and appropriateness of patient care recommendations.

Instructions for Credit

In order to receive credit participants must attend at least 1 full session and complete an online credit application and evaluation form. Participants may only claim the hours they were actually in attendance for CME credit.

Americans with Disabilities Act

Event staff will be glad to assist you with any special needs. Please contact PAINWeek at (973) 415-5100 prior to the live event.

"PAINWeek® has become the premiere conference for Pain Education."

—Will Rowe, Chief Executive Officer,
American Pain Foundation

"...an excellent multidisciplinary assembly of healthcare providers, all with the common goal of becoming better educated in pain management."

—Kevin L. Zacharoff, MD, for PAINEDU.org

"The most bias-free meeting I've been to. And that is what's really important."

—Barry Bass, MD, Houston, Texas

"I was so very impressed. It was indeed the best conference I've ever attended."

—Mary Dymond, FNP, LNC, Woodbourne, New York

"This is my third time [2008]. I think it's extremely professional, the speakers are wonderful, and I really learned a lot. I loved it."

—Elizabeth Jackson, RN, Schenectady, New York

"PAINWeek should be placed firmly on the 'must-go-to' calendar."

—Peter Foreman, DDS, Rotorua, New Zealand

Keynote Speaker

Ethan Nadelmann, PhD

Nadelmann is the founder and executive director of the Drug Policy Alliance, the leading organization in the United States promoting alternatives to the war on drugs. The Drug Policy Alliance advocates for drug policies grounded in science, compassion, health, and human rights.

Described by Rolling Stone as "the point man" for drug policy reform efforts, Ethan Nadelmann is widely regarded as the outstanding proponent of drug policy reform both in the United States and abroad.

Nadelmann was born in New York City and received his BA, JD, and PhD from Harvard, and a Masters Degree in International Relations from the London School of Economics. He then taught politics and public affairs at Princeton University from 1987 to 1994, where his speaking and writings on drug policy—in publications ranging from Science and Foreign Affairs to American Heritage and National Review attracted international attention. He also authored the book, *Cops Across Borders*, the first scholarly study of the internationalization of US criminal law enforcement.
